

707-OC

Our Color of Oil Outfits meet the specifications for ASTM D-1524 and ASTM D-1500. They use 17 permanent colored glass standards in two discs ranging from values of 0.5 to 5.0 in 10 steps and 5.0 to 8.0 in 7 steps.

The Comparator 705 is a hand-held and completely portable instrument that is ideal for use in the field, lab or plant. The comparator incorporates a magnifying prism which brings the color standards and the test sample side-by-side into one image, making it easy for the user to make an exact color match.

Orbeco-Hellige recommends the use of one of our daylight units. They provide uniform lighting in any condition and help ensure the reproducibility of results.

Ordering Information

Oil Comparator Outfit

707-OC

Includes: The Comparator 705
